# SEBO AUTOMATIC X4, X4 PET and X5

The AUTOMATIC X is the most technically advanced and reliable upright vacuum cleaner in the world! It comes in two power-head widths . . . the 12-inch X4 and the 15-inch X5. Both models feature an electronic controller that measures the resistance of the spinning brush roller against the floor and signals the power head to adjust up or down to the appropriate brush height, ensuring optimal performance on both carpets and hard floors. The controller also alerts the user to problems, such as a clog, worn brush, full bag, brush roller obstruction, and it automatically shuts off the vacuum, when necessary, to protect the motor and belts from damage. The AUTOMATIC X4 and X5 offer an instant-use cleaning wand and suction hose, a lifetime belt warranty, tool-free brush roller removal, a 40-foot power cord, three on-board attachments and protective rubber-coated wheels.

**Instant-use Wand and Suction Hose** – The integrated, instant-use wand and suction hose are always ready. Just pull out either tool to clean hard-to-reach corners, edges and crevices. The wand and hose together have an eight-foot reach. The suction hose is ideal for cleaning furniture. And an optional nine-foot extension hose is available, which creates a total hose length of 15 feet . . . perfect for cleaning stairs. Choose from a range of optional attachments that can be fitted to the wand or hose!

**Low, 5½-inch Profile** – Lower the handle flat to the floor to clean under beds, or lower it to the intermediate stop position to maneuver over rugs. Depress the foot pedal again to bypass the intermediate stop position, or close this position by moving the orange, handle-position slider.

**Automatic Height Adjustment: From Hard Floors to Carpets –**

The electronic controller adjusts the power head up or down to the appropriate brush height, providing optimal cleaning of both carpets and hard floors. The “sealing strip,” located behind the brush, improves hard floor cleaning performance by channeling the airflow and preventing debris kickback.

**Brush Adjustment Indicator Lights –** Two green lights, one for “up” and one for “down,” illuminate to indicate when the power head is in the process of adjusting brush height to the proper cleaning level. Optimal cleaning effectiveness occurs when both lights are off.

**Brush Obstruction Light with Automatic Shut Off –** If an obstruction jams the brush roller, the red “check brush” warning light flashes quickly, the brush roller immediately stops spinning, and the vacuum shuts off. This feature prevents the belts from breaking and protects the motor and carpet from damage.

**Worn Brush Light. Easy Brush Removal and Cleaning –**

When the brush roller’s bristles are worn to a point that brush agitation is less effective, the red “check brush” warning light remains illuminated during use. (The vacuum continues to operate; it will not automatically shut off.) When needed, installing a new brush roller or cleaning hair or other debris from a used brush is quick and easy, and no tools are required!

**Stationary Use Light –** When the vacuum is stationary in its upright, handle-locked position, the power head adjusts upward to the height necessary (or to its highest possible level) to disengage the spinning brush roller from the floor. However, if the brush remains in contact with carpet fibers, despite the power head’s upward adjustment, the red “check brush” warning light flashes to alert the user to avoid potential carpet marking from excessive use time in a stationary position. Usually, very high-pile carpets cause this situation, or the vacuum is tilted toward the brush roller while using the cleaning wand and/or hose. The solution is to tilt the locked, upright handle backward such that the brush is raised above the carpet pile.

**Bag Full or Clog Light with Automatic Shut Off –** When a full bag, a clog in the airflow pathway, or an excessively dirty microfilter is detected, the red “bag full or clog” warning light illuminates, the vacuum automatically shuts off after 30 seconds, and then the warning light starts continuously flashing. This feature prevents overheating and motor damage from a lack of adequate airflow.

**Combination Carrying Handle with Rotating Cord Hook –** The AUTOMATIC X is easy to carry or quickly unwind the cord, using its unique handle with integrated, rotating cord hook.

**Three On-board, Full-size Tools. Large Filter Bag –** The vacuum includes a crevice tool, dusting brush, upholstery nozzle, and a large 1.4-gallon filter bag. Also, many optional accessories are available.

**Lifetime Belt Warranty –** The AUTOMATIC X’s heavy-duty, geared belts should last the life of the machine!

**Forty-foot Cord –** A 40-foot cord saves time, by reducing the number of electrical outlet changes needed during use.

**Two Power Head Widths. One or Two-sided Edge Cleaning –** The AUTOMATIC X4 is 12 inches wide with a cleaning path of 10½ inches and one-sided edge cleaning. The AUTOMATIC X5 is 15 inches wide with a cleaning path of 14 inches and two-sided edge cleaning.

**Protective, Rubber-coated Wheels –** SEBO’s wheels protect all floor surfaces and provide smooth maneuverability.

**Easy Maintenance –** The clog removal door, replaceable brush roller and “sealing strip” are easy to access.

Attachments			
Included X5, X4 and X4 PET*			
	Crevice Tool #1092DG	Dusting Brush Horsehair Bristles #1387DG	Upholstery Nozzle #1491DG
Color Exceptions: X4 Onyx - Crevice Tool #1092SW & Upholstery Nozzle #1491SW			
Optional Three-piece Kit			
	20" Extension Wand* #1084HG	9-Foot Extension Hose* #1495AM	Parquet Brush* #1359DG
*All three items are available individually or as a three-piece attachment kit, #1991AM.			
Additional Options			
	Radiator Brush #1496DG	Flat Upholstery Nozzle #1090HG	Wall & Floor Brush #1325HG
Hand-held Turbo Brush #6179ER	Hand-held Turbo Brush #6179ER		
Bags, Filters, Accessories and Wear Items			
10 Filter Bags** #5093AM	Sealing Strip** 12" #5400-1	HEPA Service Box #5827ER contains 8 Ultra Bags, an Exhaust Filter and a HEPA Microfilter.	HEPA Service Box #5827ER
Exhaust Filter** #5143	Sealing Strip** 15" #5400-2	15" Brush Roller Set #5290AM	Charcoal Anti-odor Microfilter #5425AM
Electrostatic Microfilter** #5036AM	12" Brush Roller #5010AM	SEBO FRESH 1 Pkg. of 5 #0496AM	SEBO FRESH 1 Pkg. of 5 #0496AM
**All four items are also available as a Service Box #5828ER containing 10 Filter Bags, an Exhaust Filter, an Electrostatic Microfilter and a Sealing Strip.			
Service Box #5828ER	Service Box #5828ER		

## ADDITIONAL FEATURES:

**Designed and Manufactured in Germany** – Legendary quality, reliability and performance make SEBO vacuums the first choice of cleaning professionals throughout the world.

**World's Best Pet Vacuums** – Because of superior power-head technology, SEBO vacuums are the world's best for pet hair removal!

**Excellent for Users With Allergies or Asthma** – The British Allergy Foundation recommends SEBO filters.

**Tightly Sealed Vacuums Ensure Effective Filtration** – Dirty air, which flows through a vacuum, can only be filtered completely if it does not escape into the room through seams or seals in the machine. This is why all SEBO vacuums have tight seals throughout.

Many vacuum companies with high-filtration claims are actually quoting specifications made by the manufacturer of the filter material, as measured in the laboratory, not the filtration effectiveness of the vacuum itself while operating. Whether or not dirty air can escape through leaks in the body of the machine is not considered. The filtration effectiveness of SEBO vacuums is tested while they operate.

**Reliable Commercial-grade Components** – All SEBO vacuums are constructed with thick, reinforced, ABS plastic, aluminum and metal parts, steel axles and bearings and high-end, quality motors. Therefore, SEBO users own reliable, long-lasting vacuum cleaners. Competing vacuums are made with thin, flimsy, inexpensive, plastic materials, none of which are reinforced, and typically have useful lifespans of one or two years.

**Save Money! SEBO Vacuums Last for Years and Extend Carpet Life!** – If properly maintained, SEBO vacuums save ordinary, residential users hundreds of dollars by providing excellent performance for ten to fifteen years or more, and their deep-cleaning, power-brush technology extends the life of carpets. Typical vacuums perform poorly, even when new, and usually do not last beyond two years. So six or seven "disposable vacuums" must be purchased during the average life expectancy of just one SEBO machine.

**FREE Warranty Coverage** – All SEBO models include a seven-year warranty on the motor, and a five-year warranty on all non-wear parts and labor charges. The AUTOMATIC X models also offer a lifetime belt warranty.

## AUTOMATIC X TECHNICAL DATA:

Motor - 1300 Watts  
Body Weight - 16.7 lbs. / 16.9 lbs.  
Power Head Width - 12 in. / 15 in.  
Water Lift - 92 inches  
Airflow - 103.8 CFM  
Sound Level - 69 dBA  
Cord Length - 40 ft.

## AUTOMATIC X FILTRATION SYSTEM:

**Bagged vs. Bagless . . . Bags are Better!** – Top-fill, three and four-layer bags are an integral part of SEBO's filtration system because they hold virtually all dirt captured by the vacuum, which improves the effectiveness and useful life of the microfilters. They also ensure continuously strong suction because dirt enters from the top, deposits at the bottom, accumulates upward, and air exits through the sides, which allows unimpeded airflow as they fill to capacity. And they can be sealed when full, so no dust can escape into the air during bag removal and disposal.

In contrast, without bags to hold nearly all the captured dirt, the microfilters on bagless vacuums quickly clog from excessive dirt build-up and must be replaced often, or a loss of suction and cleaning effectiveness will occur. In addition, dust and other allergens become airborne when emptying bagless dirt containers. Lastly, bagless vacuum microfilters are expensive, usually costing more than a multi-year supply of SEBO filter bags.

**S-class, Pre-motor Microfilters** – S-class, Pre-motor Microfilters (S = "Schwebstoff" = airborne particles) are made from electrostatically charged, micro-fiber material, which attracts and captures dust particles from the airflow of the vacuum before it passes over the motor to cool it. Cooling the motor with super-clean air increases motor life and reduces the possibility of maintenance, even after many years of use. The S-class Standard requires filters to absorb greater than 99.9% of particles down to 0.3 microns in diameter. For comparison, 100 microns is the diameter of a human hair. Their advantages are a relatively open texture that allows smoother airflow for better suction performance, a longer life expectancy, and they cost less than HEPA filters.

**HEPA, Pre-motor Microfilters (Optional)** – HEPA, Pre-motor Microfilters ("High Efficiency Particulate Air") remove a minimum of 99.97% of all airborne particulate matter down to 0.3 microns in diameter. Because these filters use small, grid-like structures to capture dust particles, dirt build-up clogs the airflow pathway sooner than what is expected from S-class microfilters. However, SEBO's HEPA microfilters are sold along with four-layer "Ultra-bags," which provide highly effective filtration before the airflow goes through the HEPA microfilter, greatly increasing life expectancy and reducing the potential of diminished air flow.

**Exhaust Filters** – Exhaust filters clean the air emitted by vacuum motors.
